SCIENTIFIC AND RESEARCH ACTIVITIES

The research activities of the teaching staff, graduate students, and students of the Academy are aimed at achieving the main goal - training specialists with modern professional skills and high qualifications in the field of physical education and sport, adaptive physical education, sport, psychology, pedagogy, and management.

An important condition for the high-quality management of the educational process and research work is the professionalism of the teaching staff of the academy.

The solution of fundamental and practical scientific tasks is entrusted to the Scientific Research Institute of Problems of Sports and Recreational Physical Education, transformed from a Center for Functional Control. The Research Institute conducts scientific work in the following areas: physiology of movement, psychophysiology, electrophysiology. Research is carried out using modern scientific equipment.

The Academy has significant potential for young scientists studying at the postgraduate school, which conducts training in two specialities: 5.8. Physical education and sport, and 1.5. Biological sciences.

Sports and mass work

For the successful training of specialists in the field of physical culture and sports, and for students to fulfill transfer requirements, sports and pedagogical departments annually hold more than 130 competitions in such sports as athletics, sambo, cross-country skiing, boxing, gymnastics, orienteering, basketball, football, volleyball, etc.

Active work on the popularization and promotion of sports in the academy and the region is carried out by sports and pedagogical departments. This is reflected in the holding of competitions on the basis of the academy of National and regional scale, participation in the Championships of Russia and other competitions that prepare candidates for the national teams of the Russian Federation, athletes of the highest ranks, judges and coaches.
